## RESERVE SEAT

## Who should attend

- System administrators
- System engineers

## Prerequisites

System administration experience on Microsoft Windows or Linux operating system

## Course Content

This five-day course features intensive hands-on training that focuses on installing, configuring, and managing VMware vSphere® 6.7, which includes VMware ESXi™ 6.7 and VMware vCenter Server® 6.7. This course prepares you to administer a vSphere infrastructure for an organization of any size. This course is the foundation for most of the other VMware technologies in the software-defined data center.
